

**Meeting Minutes**  
**BSD – Sehome High School Advisory Committee**  
**May 24, 2016**

Following a community meeting presenting the proposed preliminary plans for the Sehome High School Replacement Project, the Educational Specification and Design Advisory Committee had a brief meeting to summarize the community meeting and discuss next steps.

Ron Cowan thanked the group for their participation with the committee and with the community meeting, highlighting the importance of sharing the group's work.

Minutes from the May 10<sup>th</sup> meeting were provided prior to the committee meeting and were approved as amended.

Ron questioned the committee if they needed to reconvene to make site or plan changes or if they were confident making a recommendation. The group unanimously agreed to move forward with a recommendation. The next step is for the committee to develop a written document that is a draft recommendation to the superintendent. It will talk about the process and will go out to the committee members prior to submission. Following the committee's approval, it will go to Dr. Baker for his consideration.

Ron concluded the meeting thanking everyone for their gifts, talents and efforts. It is a great project, in large part due to the group's efforts. The committee will meet again after the summer to see the progression of the design and the revised plans.

Meeting adjourned 7:45p.m.
