

Technology Steering Committee Meeting #4
2010-2011 school year
Wednesday, February 2, 4:00-6:00pm, in the Bellingham High School Library

Agenda items in black font, minutes in blue font:

1. Make recommendations for design of new schools in terms of technology integration

Cmte reviewed an article on 21st century schools and a list of ideas for modernizing schools. Cmte decided this needs to be continually reviewed as technology changes so quickly. Cmte made recommendations to submit to BART cmte.

2. Student information systems -JIM

Jim Facciano was not present to present on this.

3. Building Tech Committees: Yes or No? If yes, then what would their function be? Dialogue...

After much discussion, it was agreed that since we could not agree on what the function of building tech cmtes, we would not recommend that all schools have one. Rather, each school can choose whether or not they have a purpose and need for a building tech cmte.

4. Unpack a section (goal 2) of the District's Technology Plan and work it into a **Management Action Plan**. We'll break into 3 groups to look at the three strategies under GOAL 2.

Broke into three groups & began work on this using **Management action plan template** provide by Jim Facciano. Will need to continue work on this at our next meeting.

Next meeting: March 17, 2011 in the BHS library
