

**PreK-12 Math Committee Feedback
for January 7, 2014 Meeting**

Plus	Delta
<ul style="list-style-type: none"> • Great professional environment. • Ted talk was great and thought provoking • The non-negotiables work was efficient and valuable • The slow narrowing of focus to a concrete outcome has worked really well. • Really liked today's seating – it was less intimidating to share out ideas. It naturally encouraged small group conversation. Better than get up & move & find new people. • Like hearing from lots of people • Cookies • Good mix of activities & great discussions. • Good, positive, committed energy in the room. • Scoring article – especially last three pages helpful • Beliefs – review/change. • We know what we want/don't want (more so) • The reading (prof) was worthwhile & helped me better understand what this future resource should include. • Love the conversations we have – very productive & thought provoking. • Reading publishing criteria articles. • Reviewing Big 5 Ideas. • Grade level groups • Cross grade groups • Tighter time limits • Charisse & Jeanette are doing a great job facilitating! • Liked the process of finding our non-negotiables. • Dan Meyer was an inspiring way to end the day. 	<ul style="list-style-type: none"> • Excited to get my hands dirty! • I appreciate having actual meeting time to read, but it takes a while to do a thorough read and then debrief. • Lack of real creamer • Can we do some of the reading before? • Long time between meetings • Not sure if our screening tool will be adequate. I would have liked to see examples for comparison • Will we finalize a belief statement for math? • Clearer outcome expectations for group talks. • Can we look at the standards as a whole group to see how they progress? Might help when doing surface level eliminations.
