

**Meeting Minutes**  
**Transportation Garage Planning Committee Meeting #2**  
**March 16, 2017 1:00 p.m.-3:00 pm**

**Members Present:**

Ron Cowan  
Rae Anne Thon  
Richard Drost  
David VanderYacht  
Bruce Henninger  
Mike Bozzo  
Terry Brown

Terry welcomed the group together. Minutes from the previous meeting were then approved by the committee.

Terry shared the agenda for the meeting. He reviewed the site plan and initial revised building layout in which the two existing center parking bays would be converted to maintenance bays. Advantages include wider bays and higher ceiling clearance. In addition, this concept offers the possibility of being able to continue servicing vehicles during the construction period.

Committee members spent time providing input and discussing various facility needs including fluid and air distribution, hoists, door height/width, break room space, welding (not enough welding for a dedicated welding booth), restrooms, etc. as noted in the [Bus Maintenance Facility needs document](#).

The group spent considerable time discussing a bus wash area and a steam cleaning area.

Terry will take the input provided and develop an initial floor plan for review at a future meeting.

Meeting adjourned 3:00p.m.

Next meeting: March 31<sup>st</sup> 7:00a.m.-12:00p.m. (Tour other school Transportation Garages)
